FEEDING GUIDELINES:

For newly weaned puppies, moisten the food with water and feed frequently until 5-6 weeks old. Divide the recommended serving amount into at least three equal daily servings for the puppy from 6 weeks to 6 months old. After 6 months, divide the recommended serving amount into two meals per day. In addition to food, always make sure fresh water is available. Additional vitamins, minerals, and other supplements are not necessary. When switching foods, adjustment should be gradual. If a loose stool persists beyond three days, consult with Precept or your local veterinarian. Feeding amounts may vary by breed, activity level, temperament, and climate. Pregnant or nursing dogs may need food available at all times.
